QUESTIONS AND ANSWERS

1. **Question: The detail on the parking lot poles calls for a concrete pole to be bolted to a concrete foundation. After talking to vendors, we are not aware of this type of light pole. Will the use of a metal, or another type of material pole be acceptable?**

Answer: Concrete is the preferred method given the Duke Energy specification. Changes to pole material and foundation requirements will be considered based on lead times or availability.

2. **Question: Do the seeding and landscaping scopes need to provide a warranty?**

Answer: Seeding shall meet requirements as specified on Sheet EC-01 and Specification 1660. Seeding will not require a warranty. Landscaping will need to provide a warranty.

3. **Question: Is there any details on what type of sign and the location of the signs along the haul route? (G-03, Note 10).**

Answer: There are no details provided for the sign. Contractor shall provide submittal that meets requirements and/or is approved equal by the Engineer. Contractor shall install 4'x8' signs at all access points to construction site. Contractor shall also provide directional signs for hauling as needed.

4. **Question: Bid item 25 and Deductive bid item 2, please confirm that this should read 30" CONCRETE CURB AND GUTTER (G-01)?**
